PROFESSIONAL EXPERIENCE

Full-stack Developer | 2023 - 2024

Cosmostation

- **API Service**
  - https://api.mintscan.io
  - Front-end development, including extension-based login and tracking pages for used API tokens.
  - Back-end development, adding support for additional chains, configuring API queries for front-end use, and developing custom APIs for validator delegators.

  Front Language: TypeScript, NextJS, SASS, Recoil

  Back Language: Express, NestJS, TypeORM, MySQL, Elastic Search

Front-end Developer | 2021 - 2023

Cosmostation

- **Mintscan**
  - https://www.mintscan.io
  - Developed scan pages for the COSMOS ecosystem, including blocks, transactions, proposals, and accounts.
  - Established a management system for adding custom chains.
  - Researched and implemented custom features, including account vesting, inflation, APR calculations, contract pages, and DeFi-specific pages.
  - Enhanced pages related to specific chain dApp ecosystems and proposals.
  - Addressed user customer service requests and foundation requirements.

  Language: Typescript, NextJS, SASS, Material-UI, SWR, Recoil, MobX

- **Splash Dash**
  - https://dash.splash.im
  - Provided staking functionality support for SUI validators.
  - Established extension connections and transaction transmission using wallet kits to support various wallets.

  Language: Typescript, React, SASS, Recoil

- **Aptos Scan**
  - Developed scan pages for the APTOS chain, including blocks, transactions, accounts, and epochs.

  Language: Typescript, React, SASS, Material-UI
